Stamford, Conn.
U. S. A.

Foreword

FOR nearly a quarter of a century The Excelsior Hardware Company has concentrated its attention on the manufacture of Trunk and Suit Case Locks, together with a limited line of the most popular types of Cabinet Locks.

WITH this restricted range of product it has been possible to devote close attention to even the most common details of design, manufacture and finish.

THE principle that such "attention to trifles makes perfection" has met the natural response that "perfection is no trifle," as evidenced by the fact that, during our entire experience in lockmaking, despite repeated additions to the capacity of our plant, and even in wartime, it has been difficult to keep pace with the demand.

AN additional factory building is being erected at this writing, with capacity for an increase of eighty percent. production.

EACH Lock and Key is clearly illustrated by half-size engravings, supplemented by text descriptive of the metal used, the mechanism, the principal dimensions, and other important features not possible to show in the engravings. The dimensions listed are actual sizes, not the nominal sizes frequently published in lock and hardware lists.

CONFIDENTIAL price lists, and any other pertinent information desired, will be gladly sent to those interested.

Elisha Mix

*President and Founder,
The Excelsior Hardware Company,
Stamford, Conn., U. S. A.*

April 5, 1919.

P. S. All of our locks are made complete in our own factory at Stamford, Conn. We have no connection whatever with other lock manufacturers or dealers doing business under similar names.
