PADLOCKS  
AUTOMOBILE TIRE  
AND ROBE LOCKS

# Padlocks

Size,  $2\frac{1}{4}$  inches

Made of Bronze Throughout

No.	Packed One-Half Dozen in a Box	List per Doz.
47	Bronze, Four Tumblers, Two Flat German-Silver Keys, with Chain and Key Hole Cover.	
48	Same as above, except without Chain or Key Hole Cover. Key Blank No. 59 for above locks.	

We recommend the style of padlock described above to be a first-class guardian for doors where security is of prime importance. It is intended to withstand the malicious and accidental injuries which frequently fall to the lot of the padlock, also to be perfectly free from harm through rust or corrosive influences; with this end in view, it is constructed of bronze throughout, the tumbler springs are of high-grade phosphor-bronze, and the heavy spring which throws the hasp is of hard-rolled German-Silver.

It has a large number of changes and can be Master Keyed, which at once commends itself to those desiring a number of locks set up in this manner.

Keys cannot be duplicated by the numbers.

About one thousand changes.

By special adaptation of tumblers, can be Master Keyed to the extent of seventy-five changes. By adding another tumbler can be increased to one hundred and fifty changes. See page 9.

Weight—9 lbs. per dozen. No. 47.

—8 “ “ “ “ 48.

 Keys can be duplicated by the numbers.  
 Weight—7 lbs. per dozen 25-inch.  
 " —8 " " " 40-inch.

## For Safeguarding Robes and Coats

## Tire Protection

Robes, coats, etc., are stolen from cars simply because they are not properly guarded. It is not to be expected that the owner can take robes, coats, and whatever else may be in the car, each time he has occasion to leave the car; but he can guard against possible theft by simply securing same with the Safe Guard Lock.

Easy to put on, takes but a few seconds, locking at any link of the *case-hardened* chain, won't tear or wear the articles secured. Relieve your mind from worry and responsibility.

Perhaps nothing appeals more to the auto thief than your tires. Why? Because they will net him more and are more readily disposed of than any other article he may take.

Protect your tires with the Safe Guard Lock. Fits any place, needs no extra equipment, and can be used any place. Save time, trouble and money by using this lock.
